

Our family is **GROWING**

The CDM+ family has new programs, features and services you'll definitely want to meet!

We're proud to add two powerful new programs to the CDM+ suite . . .

▶ **Check-In/Check-Out**

The easiest way to know who's present *and* safeguard those little ones entrusted to your care!

▶ **Web Ministry Tools**

The Web is where people connect, so use CDM+ to make your site a hub for ministry!

plus . . .

▶ **Enhanced Notices**

This optional feature works throughout your CDM+ suite to turn CDM+ into a word processor!

▶ **Remote Backup Service**

The hassle-free way to keep a current offsite backup!

and a new . . .

▶ **Check Image Scanner**

CDM+

CHURCH MANAGEMENT SOFTWARE

Check-In/Check-Out

More accurate than a sign-in sheet and secure enough to provide parents and caregivers the peace of mind that comes with knowing their loved ones are safe in your care!

Check-In/Check-Out comes loaded with options:

- ▶ Verify information such as phone numbers and addresses and make corrections on the fly
- ▶ Compatible with DYMO label writers, touchscreen monitors and barcode scanners, but extra hardware not required
- ▶ Easily create custom name tags with logos or group names and print ahead of time or during check-in
- ▶ Add optional barcodes to name tags, check-out receipts and ID cards to improve accuracy

Record attendance for any group:

- ▶ Record attendance for groups of any age
- ▶ Automatically file attendance records to your CDM+ database from check-in stations

Safeguard the little ones in your care:

- ▶ Pre-authorize who can check individuals in and out; specify the relationship each person has to the individual to be checked in or out
- ▶ Select each individual to see photos of the people who can check him/her out
- ▶ Lock the Check-In/Check-Out display at any time to prevent unauthorized access

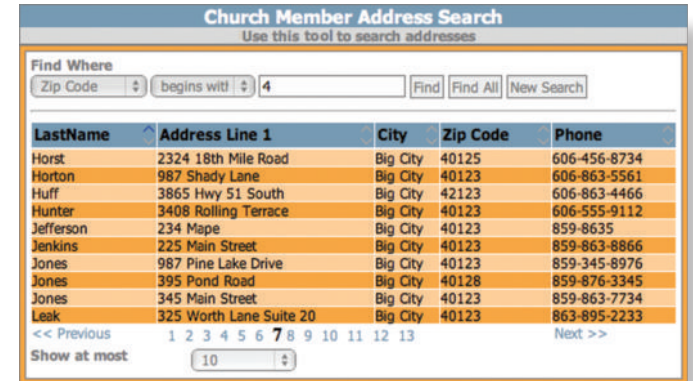

Web Ministry Tools

A new service from CDM+, Web Ministry Tools makes it easy to publish elements of your CDM+ data directly to the church web site. Share information from CDM+ with your congregation, visitors, clergy and small group leaders without training them in CDM+.

With CDM+ Web Ministry Tools you can:

- ▶ Give members limited and secure access to live information in your CDM+ database, such as a searchable directory of names, addresses, phone numbers and e-mail addresses
- ▶ Publish your church calendar on your web site
- ▶ Register individuals for camps, retreats and Vacation Bible School, including online payment options through a secure server
- ▶ Display the current balance for any account from the Chart of Accounts in CDM+ Accounting
- ▶ Easily edit the look of information displayed to coordinate with your web site design

Best of all, once you make a simple change to your web site, you don't have to edit HTML or FTP files to post your changes to the web. Simply work in CDM+ as you normally would and your changes appear on your web site automatically.

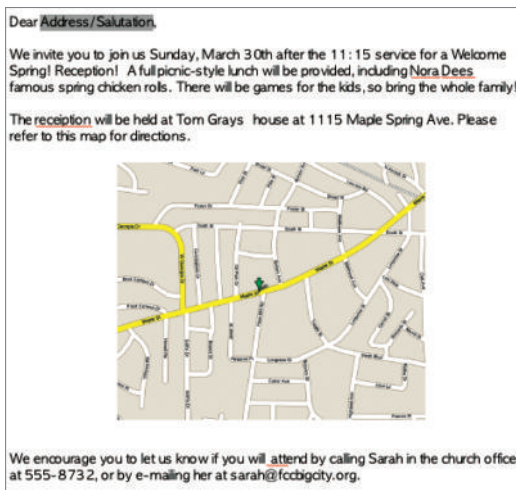

Check Image Scanner

Speed up contributions entry and eliminate the need to photocopy checks. The new image scanner provides an actual picture of each check.

- ▶ Automatically scan check images during contributions entry
- ▶ Scanning enters the check number and looks up the giving unit
- ▶ View, scan or import check images to existing contributions
- ▶ Save check images to a file
- ▶ Easily retrieve a copy of a check at any time
- ▶ Print a check listing report either in a one-page-per-check format, or 8 checks per page
- ▶ Compatible with Mac and Windows operating systems (Ethernet network required for Mac; USB or RS 232 Serial port for Windows)

Enhanced Notices

Create professional-looking documents within your CDM+ program that can be printed or shared electronically.

This optional feature adds word processing functionality right in CDM+, including spell-checking. Easily create any of the following:

- ▶ Word merge letter and card notices, including visitor letters and Event Registration notices with spell-checking and mixed fonts
- ▶ Formatted e-mail notices with graphics/photos capabilities and embedded merge fields
- ▶ PDF reports
- ▶ PDF giving statements

Added benefits:

- ▶ Eliminate data merges with our drag-and-drop database fields to personalize mass communication
- ▶ Increase accuracy with built-in spell-checking with the option of custom dictionaries
- ▶ Format text size, style, alignment, color, etc.
- ▶ Set tabs and indentations and create bulleted lists
- ▶ No extra training necessary. Even if you're a novice to word-processing software, you can master this

Auto Backups

Nothing you do is more important than making sure the church's data is secure, and backing up frequently is key.

- ▶ Schedule and perform backups easily without a third party program
- ▶ Back up to any media of your choice

Coming soon—Optional Remote Backup Service: *

- ▶ Back up your data to our remote servers and know that you always have a current offsite backup
- ▶ Minimal monthly fee based on disk usage
- ▶ A log confirms successful backup of your data
- ▶ Easily retrieve your data via download from a secure web site interface
- ▶ An e-mail alert warns you if no backup is completed

* included for data hosting clients as part of data hosting service

New for your ministry from CDM+!

- ▶ **Check-In/Check-Out**
- ▶ **Web Ministry Tools**
- ▶ **Enhanced Notices**
- ▶ **Remote Backup Service**
- ▶ **Check Image Scanner**

Adding the new products featured in this brochure to your CDM+ suite requires that you have CDM+ 8.1.2 or later. CDM+ 8.1.2 update available May 2008.
